<b>Description</b> The page was working fine until a new post was published. When the new post was published this morning, the rest of the landing page went white. Could this be related to the PHP upgrade? Screen Shot 2018-10-22 at 10.29.03 AM.png

Thanks for the report, Lisa. It does appear to be due to a PHP 7.2 incompatibility. I've fixed it in <https://github.com/cuny-academic-commons/cac/commit/1bd2dd37a88ae07d5748ae7c9ec2c24d02034595> and deployed to the production site. Please let me know if you continue to see problems.
