CUNY Academic Commons - Bug #1068

Notification of Update in a Private Group Shows up in Public Feed

2011-07-21 10:57 PM - Matt Gold

Target version:	1.2.5			

Description

Here's the post in question:
http://commons.gc.cuny.edu/groups/lilac-instructional-technology-working-group/forum/topic/meeting-minutes-1/

When I tried to find the activity item on the news page, I saw a red box saying "You do not have access to this activity."

However, the post showed up in my feedreader. Please see the attached screenshot.

Is it somehow not being shown on the site but still part of the feed?

I tried reproducing the problem on my test setups but could not do so. My guess is that Maura created the group as public, posted the forum topic, and then switched the group to private (by which point Google had already cached the feed item). Maura, can you confirm or deny?

#2 - 2011-07-21 11:24 PM - Maura Smale

Yeah, this happened to me too, and to be honest I'm not entirely sure why. It's highly likely it's my fault -- I created the group yesterday and could have sworn I made it private. But then it showed up in my feed tonight too so I went in to check and it was public (so I changed it). Unless anyone else reports something like this I'd chalk it up to user (me!) error.

Thanks!

- Status changed from Reporter Feedback to Rejected

Phew. Thanks, Maura. I'll keep my eye out for any reoccurrence of this.
