Disappearing submit button on Forum post

Description			
I am experiencing a bug on the forum. When I paste a long URL (such a wetransfer link) it borks the preview, and causes the submit to disappear (I think it is forced to the right). I have replicated this on MacOS (10.11.6) in Chrome (Version 70.0.3538.110). I checked on a Windows 10 / Firefox and it worked fine. Image attached. !

Thanks for the detailed report, Michael.

Ray, could you take a look? Looks like either a max-width or a white-space declaration will fix this.
