Description			
I've just had two alerts that removing members from a group isn't working, and I can replicate it. Clicking remove member provokes a blank white screen (shot attached).			

History

- Category name set to Groups (misc)
- Status changed from New to Resolved
- Target version set to 1.14.6

This is caused by an incompatibility between a legacy piece of custom code and PHP 7.2. I've fixed it in <https://github.com/cuny-academic-commons/cac/commit/32d860e82f013340087c5858c9a51d08e5932c04> and deployed as a hotfix. Please let me know if the problem recurs.
