

## NYCDH Community Site - Bug #11013

### Convert subdomain install to subdirectory install

2019-01-24 10:02 PM - Raymond Hoh

<b>Status:</b> Resolved	<b>Start date:</b> 2019-01-24
<b>Priority name:</b> Normal	<b>Due date:</b>
<b>Assignee:</b> Raymond Hoh	<b>% Done:</b> 0%
<b>Category name:</b>	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Description</b> NYCDH does not have a wildcard SSL certificate, so we cannot enforce HTTPS across the entire NYCDH multisite install due to our multisite configuration using a subdomain set up.  Converting our multisite install from a subdomain configuration to a subdirectory one would allow us to enforce HTTPS.  I'll look into making this conversion some time after DH Week is completed so we won't disrupt anything.

##### #2 - 2019-03-28 04:32 PM - Matt Gold

Hi Ray -- I wanted to give this issue a bump, as we should probably move NYCDH to SSL sooner rather than later. thank you!

##### #3 - 2019-04-01 05:12 PM - Raymond Hoh

Thanks for the bump, Matt.

I'll get to this probably by the end of next week at the latest.

##### #4 - 2019-04-01 06:47 PM - Matt Gold

Thanks, Ray. We may want to take Lihua's vacation schedule into account

##### #5 - 2019-04-01 06:48 PM - Matt Gold

(I think Boone cc'ed you on an email about that, but I'll check and forward to you if not)

##### #6 - 2019-04-01 07:51 PM - Raymond Hoh

Thanks Matt. It probably makes sense for me to do the switchover after Lihua gets back.

##### #7 - 2019-05-02 07:20 PM - Raymond Hoh

Hi Matt,

I'm almost ready to make the switch to a subdirectory install, but before I do, can you audit the list of sites here:

<http://nycdh.org/wp-admin/network/sites.php>

And make sure to either delete or archive sites that are no longer active? The reason I ask is making the switch will require some manual work from me to update the site URLs.

Let me know if you have any questions.

##### #8 - 2019-05-03 08:12 PM - Raymond Hoh

Hi Matt,

I took the liberty of going through all the sites on NYCDH.

These are the ones we can keep for sure:

- <http://dhweek.nycdh.org/>
- <http://art.nycdh.org/>
- <http://omeka2014.nycdh.org/>
- <http://digitalantiquityworkinggroup.nycdh.org/>

These ones have test content and are candidates for removal:

- <http://montclair.nycdh.org/> (just a landing page to another site)
- <http://bpham.nycdh.org/> (has unpublished drafts, last active 2014, but basically empty)
- [http://aids.nycdh.org](http://aids.nycdh.org/) (basically empty, except for a few intro posts)
- [http://jlab.nycdh.org](http://jlab.nycdh.org/) (basically empty, except for an intro post)

The rest of the sites not listed can be deleted.

Let me know what you think before I do the subdirectory switchover.

- Status changed from New to Resolved

Hi Matt,

I've gone ahead and converted the subdomain install into a subdirectory one. I've also written a redirect rule so all older subdomain links should get automatically redirected to their subdirectory equivalent.

When you have a chance, this would be a good opportunity to remove sites that have either no content or barely any content at all. I've already made a site audit in my previous post. Let me know what you think.

For now, I'm going to mark this as resolved. Let me know if you encounter any bugs.

**#10 - 2019-05-14 04:59 PM - Matt Gold**

Fantastic. thank you, Ray! It looks great

**#11 - 2019-05-14 09:04 PM - Raymond Hoh**

Matt, can I go ahead and delete all the sites except the ones I listed above?

**#12 - 2019-05-15 06:25 PM - Raymond Hoh**

Hi Matt, I've gone ahead and deleted all remaining sites except the ones I listed in comment 8.

**#13 - 2019-05-21 11:07 AM - Matt Gold**

Thanks for this and sorry for the late response, Ray
