

## CUNY Academic Commons - Bug #11297

### Two versions of the same plugin and theme exist

2019-04-08 02:02 PM - Raymond Hoh

<b>Target version:</b>	1.14.11		
<b>Description</b>			
<p>In Git, you can have folder names with different capitalization and they will be distinct.</p> <p>For example, wp-content/themes/LayerSlider: <a href="https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/plugins/LayerSlider">https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/plugins/LayerSlider</a></p> <p>Is different than wp-content/themes/layerslider: <a href="https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/plugins/layerslider">https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/plugins/layerslider</a></p> <p>We need to remove the duplicate ones:</p> <ul style="list-style-type: none"><li>- In /wp-content/plugins/, LayerSlider should probably be kept, while the other one should be removed.</li><li>- In /wp-content/themes/, there are two Basic themes, but they are both different...: <a href="https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/themes/Basic">https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/themes/Basic</a> <a href="https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/themes/basic">https://github.com/cuny-academic-commons/cac/tree/1.14.x/wp-content/themes/basic</a></li></ul> <p>I would make the LayerSlider change, but Git on Windows is a little problematic: <a href="https://docs.microsoft.com/en-us/azure/devops/repos/git/case-sensitivity">https://docs.microsoft.com/en-us/azure/devops/repos/git/case-sensitivity</a></p> <p>Not sure what to do with the Basic themes. Maybe nothing needs to be done.</p> <p>Boone, I'm assigning this to you since I do not develop on a Linux OS (although I really should!).</p>

- Status changed from New to Resolved

The Basic themes are different. Since there's no problem, I think nothing needs to be done in that case.

LayerSlider does seem like a problem, since it's the same plugin. I've removed layerslider from the codebase in <https://github.com/cuny-academic-commons/cac/commit/5ae70ec94936cbd51362f56912167ff035d59d65>, and run a routine to switch sites running the old plugin to the new one.
