Description			
Amy Wolfe reports: "Looking at my Commons profile (https://commons.gc.cuny.edu/members/awolfe/blogs/) I'm a bit confused. It lists me as the sole administrator on several sites where I'm not an administrator and haven't been interacting with these sites in a very, very long time. I do not know how to remove myself from the role of administrator from these sites, they aren't "My sites". Can you help? 1. CUNY Women in STEM - https://womeninstem.commons.gc.cuny.edu/ 2. - Target version set to 1.15.1

There is a bug in the leave site functionality that doesn't properly show the role when a site is connected to a group.

I'm looking into this.

If a user could not leave a site, the role would always display as "sole Administrator", which is wrong. This is fixed in <https://github.com/cuny-academic-commons/cac/commit/08b9f627750e43fae95a8c3cd0c7d2d7b079bdc5>.

I've also added the group link to the role text if a site is connected to a group, which I think will be useful.
