Description

Hi Ray,

I was revieiwing the GCDI site today (http://gcdi.commons.gc.cuny.edu) and I noticed an error on the people page. If you scroll down to the Social Media Fellows section, you'll see that the left column is extended, while the right column is squeezed. From some digging, it looks like there is a code-level error - the "layout-9" in the following code should be a "layout-6" as it is for the other sections.

<section id="socmedfel" class="builder-section-prev-text builder-section builder-section-text builder-section-next-text gcdi-profiles builder-text-columns-2 layout-9" style="background-size: cover; background-repeat: no-repeat;background-position: center center;">

What other information can I provide you with? Could we fix this in time for the next release?

Thanks,
kristen

Hi Kristen,

I checked the revision log for that page and it looks like it was changed by you, probably by accident:
https://gcdi.commons.gc.cuny.edu/wp-admin/revision.php?revision=10823

The only way I figured out to change the layout in the Make UI is to manually switch the number of columns for the "Social Media Fellows" section to 1 temporarily and then I changed it back to 2. Next, I saved the page and this appeared to have fixed things.
