To be clear, this plugin simply acts as a bridge between the WP site and the user's Browse Aloud subscription. It doesn't actually provide the text-to-speech functionality - it appears that the plugin doesn't do anything unless the end user signs up for a trial or gets a subscription <https://www.texthelp.com/en-us/pricing/>. Scott, is that your understanding? Is that what the requesting member expects?

Hi Boone - I will let you know when I hear back from him. This is probably not what he expects.
