<b>Description</b>			
<p>- What's the name of the plugin/theme?</p> <p>Text Expander</p> <p>- [plugins] In a few words, what does it do?</p> <p>Allows you to define areas of text that expand/collapse when clicked. It is an improved version of Dagon Design's Expanding Text-Plugin.</p> <p>- How is the plugin/theme different from what's already provided on the Commons?</p> <p>We do not currently provide this functionality.</p> <p>- What's the potential impact? Who will use it?</p> <p>Could be very useful for all sorts of sites, include FAQs. But here are Leila's thoughts:</p> <p>This is for the SPS writing fellows. Currently, the model assignments and tutorials that last year's fellows put together exist only in long lists that are difficult to read. I think displaying the information by title with expandable content would be much easier to navigate, but I need this plugin to make the text expand.</p> <p>- Who initially made the request?</p> <p>Leila Walker, a Writing Fellow for the School of Professional Studies</p> <p>- Who is the plugin author?</p> <p>don't see an author listed on the WP plugin repo</p> <p>- Say a little bit about the release history and popularity of the plugin. How many times has it been downloaded? When was it last updated?</p> <p>Slight cause for concern here. Plugin hasn't been updated since January. 4500+ downloads. Average 4 star rating. Some posts on the WP forums saying it doesn't work. We should test.</p>
