Description

From ZenDesk

"I don't know if there is an easy way to embed a tableau public visualization into my Wordpress site on the Commons. I have tried the embed block, using iframe, and the Tableau JavaScript API but none of them have worked. I found a plugin that could be helpful to embedding tableau public visualizations.

Here is the link: <https://wordpress.org/plugins/wptab-tableau-public-viz-block/>"

I'm at a loss, sorry to say.
