

CUNY Academic Commons - Support #13035

Commons 1.17 and BP Docs - TinyMCE options and layout

2020-07-11 04:09 PM - scott voth

Status:	Rejected	Start date:	2020-07-11
Priority name:	Normal	Due date:	
Assignee:	Boone Gorges	% Done:	0%
Category name:	BuddyPress Docs	Estimated time:	0.00 hour
Target version:	1.17.0		
Description			
I am doing documentation and I noticed TINY-MCE difference in Dev and Prod in BP Docs. It seems in Prod there are more options in the toolbar. Also noticed that switch from "Visual/Text" option is not available in 1.17 version.			
Is this intentional or does it need to be fixed?

- Status changed from New to Reporter Feedback
- Target version set to 1.17.0

Hi Scott - The Docs create/edit view has been totally replaced, and the new view doesn't actually use TinyMCE at all, but a different set of rich-editing tools. I was able to mimic much of the TinyMCE experience using the new tools, but not all of it. This is why there's a difference.

IMO we should classify this as part of our overall consolidation and simplification of the interfaces in this release.

Boone - I'm fine if you want to close this ticket.

#4 - 2020-07-14 02:21 PM - Boone Gorges

- Status changed from Reporter Feedback to Rejected

Sounds good. Thanks, Scott!
