

## CUNY Academic Commons - Bug #13328

### cross-posting in two related groups

#### Description

A user (Corey Scher) reports the following:

"Both Andres (cc-ed) and myself ar TA-ing a course at CCNY where we are using Academic Commons.

Somehow, there is a mix-up that appears to be occurring on the back-end of the system, where Andres and his students are somehow posting to my group page, even though my group is hidden.

Here is the link to my group:

<http://cuny.is/group-eas-106-lab-fall-2020-group-2>

And here is the link to Andres group:

<http://cuny.is/group-eas-106-section-c3-group-3>"

See attached screenshots and let me know what to ask next. I did notice that the reverse is also happening - his group 2's postings show in Andres' group 3 forum.

#### History

##### #1 - 2020-09-15 10:53 AM - Marilyn Weber

I'm wondering if this is related to <https://redmine.gc.cuny.edu/issues/13266>

##### #2 - 2020-09-15 11:14 AM - Marilyn Weber

Apologies, the reverse is not also happening. The other group owner writes:

"No. I do not see any of Corey's students posts. The problem seems to be that my students are posting in his group.

~andres "

##### #4 - 2020-09-15 11:27 AM - Boone Gorges

- Assignee set to Raymond Hoh

Thanks, Marilyn.

It appears that both groups are linked to the forum with the ID 93769, title 'EAS 106 - Section C3 - Group 3'. This correct for one of the groups, but incorrect for the 'Group 2' group.

Ray, could you please take a moment to look through the forums related to 'EAS 106' and figure out whether there's one with the 'Section C3' and 'Group 2' label that it looks like we should associate with the Group 2 group? If not, we will need to create one. Then, I guess we'll have to move over those topics in the Group 3 forum that were created by Group 2 members into the Group 2 forum.

##### #5 - 2020-09-15 12:34 PM - Raymond Hoh

I caused this issue. See <https://redmine.gc.cuny.edu/issues/13266#note-4>.

When I was trying to connect some orphaned topics where meta\_key = '\_bbp\_forum\_id' and meta\_value = '0', I made the wrong determination for which forum and group these topics should be connected to.

I will look into this some more in a few hours later today since I have an appointment to attend to.

##### #6 - 2020-09-15 10:39 PM - Raymond Hoh

- Category name set to *Group Forums*
- Status changed from *New* to *Reporter Feedback*
- Target version set to *Not tracked*

Hi Marilyn,

Please tell Corey that I've moved all relevant topics to Andres' group. Also tell him that I've removed forum replies that he made to Andres's students to avoid confusion.

I mostly removed replies with the post content:

Move this and all discussion relevant to Lab 2 in the "Lab 2: Discussion" post that I made

If Corey or Andres notices any other issues after the reorganization, please let me know.
