

CUNY Academic Commons - Bug #13494

Brief Descriptor and About You Profile Fields do not display on mobile devices

2020-10-23 09:23 AM - scott voth

Status:	Resolved	Start date:	2020-10-23
Priority name:	Normal	Due date:	
Assignee:	Boone Gorges	% Done:	0%
Category name:	Public Portfolio	Estimated time:	0.00 hour
Target version:	1.17.6		
Description			
Bret Maney writes "When you view the profiles on mobile (Safari or Chrome on iPhone but I believe on Android as well), the "Brief descriptor" and "About You" fields don't show. If you swipe down, you can sort of get a glimpse of them, but not really." I too see them briefly, but then they disappear.

- Target version set to 1.17.6

Thanks for the report. It looks like something funny happens when the WP toolbar height changes at narrow window widths, so that our 'sticky' library incorrectly calculates the offset of the top row, thinking that it should be 'stuck' even before scrolling has begun. It's likely that much of this logic will have to be rewritten as we move to an upgraded version of jQuery [#13352](#), which will require an upgrade to the Waypoints library in cac-advanced-profiles. As such, I'm going to put a small hack in place to make it work rather than digging into the root causes. See <https://github.com/cuny-academic-commons/cac-advanced-profiles/commit/8296401561c67dbb7eb7d202db5e53cb666b74c1>
