Target version:			
Description			
The DHWeek site on NYCDH is currently running Avada 6.1. The latest version is 7.1.			
Just wanted to know if we have access to the latest version. If so, can someone provide me with the latest version of the theme? The theme also requires the Avada Core and Avada Builder plugins, which should come bundled with the theme or in a separate download.			
Before upgrading, here's a list of major changes from Avada 6.2 and up: https://theme-fusion.com/documentation/avada/installation-maintenance/important-update-information-archive/			
This might be useful just in case anything breaks (layout-wise) and will require some attention.			
Could hold off the upgrade until closer to DHWeek as well.
