<b>Target version:</b>			
<b>Description</b>			
We need to update the calendar plugin and associated Filter bar plugin, the functionality has deteriorated and is causing display issues due to the old versions. This is for the NYCDH Week site.  I am also attaching the newest avada 7.2.1 and the associated builder (3.2.1) and core (5.2.1) plugins. There may be patches that need to be installed.

- Status changed from New to In Progress

Hi Jesse,

I've made the updates.

Avada says there are two patches that are needed: 418553 and 418556. Can you download those from here?

<https://theme-fusion.com/support/themefusion-system-status/>

Thanks!

##### #2 - 2021-02-26 03:14 PM - Raymond Hoh

I've just updated the regular version of Events Calendar to 5.4.0 since there was an update available.

It appears that Events Calendar Pro needs to be updated to 5.3+. Can someone provide me with the latest version as well as the Avada patches I listed above?

**Update** - Until we can update Events Calendar Pro, I've rolled back the regular version of Events Calendar back to 5.3.2.1 to avoid any disruptions with the NYCDH Week site.
