

CUNY Academic Commons - Support #13958

calendar widget problem

2021-02-08 12:26 PM - Marilyn Weber

Status:	Resolved	Start date:	2021-02-08
Priority name:	Normal	Due date:	
Assignee:		% Done:	0%
Category name:		Estimated time:	0.00 hour
Target version:	1.18.4		
Description			
via Zendesk:			
<p>The calendar widget on our website is one month off. See attached screenshot: it lists under "Jan 2021" all the events of Feb 2021. The same happens if you go into March, etc. The days of the month are correct, only the month is incorrect. So an event for Feb 25 will appear on the calendar under Jan 25. When you click on Jan 25 in the calendar widget it takes you to the entry for the Feb 25 event.</p>			
<p>This is our calendar page (with widget): https://acert.hunter.cuny.edu/events/calendar/</p>			
<p>What are we overlooking? Any idea how we could fix this?</p>			
<p>Thank you!</p>

She'd be open to using a different plugin : "To be honest, I don't know what's used for the calendar. I just started as ACERT director and our admin has only worked with ACERT and the site since last October. We just caught this. Thanks for any help you can provide! Julie"

- Status changed from New to Staged for Production Release

- Target version set to 1.18.4

This appears to be an upstream plugin bug <https://wordpress.org/support/topic/wrong-month-in-calendar/>. The fix described there should be included in tomorrow's plugin updates on the Commons.
