

CUNY Academic Commons - Bug #1419

Ajax autosuggest on wiki tags not working

2011-12-08 11:10 PM - Matt Gold

Status:	Rejected	Start date:	2011-12-08
Priority name:	Normal	Due date:

Category name:	Wiki	Estimated time:	0.00 hour
Target version:	1.3		
Description			
Just tried the ajax autosuggest for tags feature on the cdev wiki (http://cdev.gc.cuny.edu/wiki/index.php/Design_a_Lean_and_Clean_Online_Interface_To_Promote_Learning) and found that it didn't work. Using latest version of Chrome (15.0. . . .), Mac OS X Lion, Javascript allowed on all pages.

Please give more details than "it didn't work".

#2 - 2011-12-09 08:33 AM - Boone Gorges

I did find a bit of funniness in the fact that the character encoding on cdev was causing upper/lower case confusions when looking for tag matches. I have written a workaround. Maybe that will solve your problem?

Not sure. When I start typing words like "Blackboard" or "blackboard" or "Teaching" or "teaching" or "Technology" or "technology," nothing happens . . . I'll have my laptop with me at today's meeting, so I can show this to you if you want.
