Description			
I currently use Gravity Forms to allow users to submit blog posts on several sites (e.g., bmccetls.commons.gc.cuny.edu/ and https://abiseminarsummer21.commons.gc.cuny.edu/), but the built-in functionality is limited. The Advanced Post Creation Add-On would add functionality for generating user-created blog posts. https://docs.gravityforms.com/category/add-ons-gravity-forms/advanced-post-creation-add-on/

Yes, this seems fine. We've got the plugin available under our existing Gravity Forms license. It'll be part of our next scheduled maintenance release, which will be on July 13.
