Target version:			
Description			
Do we have a way to embed Zoom recordings in a post? I looked in Help but didn't see anything. Thanks! No rush. Happy New Year!

A bit of research suggests that this is not currently straightforward, due to limitations in the way that Zoom's APIs work. See <https://wordpress.org/support/topic/embedding-zoom-recorded-videos-using-zoom-cloud-links/>. The available plugins for Zoom integration require the creation of a developer key, which is very complex for something as simple as embedding a recording. The official Zoom recommendation <https://devforum.zoom.us/t/embed-cloud-recording/14822/5> appears to be to download the recording from Zoom, then upload to a third party like YouTube or Vimeo and embedding from the third party.

OK, that sounds reasonable to me.
