

CUNY Academic Commons - Bug #15175

"Load More" button not working correctly on a user's "Commons Profile > Activity" page

Description

While looking into [#15152](#), I discovered that the "Load More" button was not working correctly when on a user's "Commons Profile > Activity" page. The problem is the pagination could be using the wrong page offset and the loading GIF was not showing up when clicking on the button.

The problem is in our bp-nelo theme, the JS selectors for the News / My Commons page and a user's "Commons Profile > Activity" page are different. We need to ensure that the selectors are the same for both pages. As for the pagination bug, we have to port the following fix over from the BuddyPress bp-legacy template pack: <https://buddypress.trac.wordpress.org/changeset/12181>.

Fix coming shortly.
