#### Description

Hi André. I'd like to create a placeholder site for the Commons In A Box project on the Commons. Could you please create vhost definitions for the following domains?

commonsinbox.com, commonsinbox.org, commonsinbox.net, commons-in-a-box.com, commons-in-a-box.org, commons-in-a-box.net

They should point to our regular web root (as in [#1501](#)).

Thanks!

Added both now and reloaded the server configuration.

We can now simply set these addresses as CNAME of commons.gc.cuny.edu with their name service provider.
