fora.tv shortcode added in <https://github.com/castiron/cac/commit/1d7e73d13a0f181a9dc5be27253c939d1c50a366>

#### Usage:

When writing a blog post or page, you can embed a fora.tv video by using the following syntax:

```
[foratv id="12345"]
```

When you publish or preview the post/page, this will turn into an embedded iframe.

You can get the fora.tv id of a video by looking at the embed code provided on the fora.tv website. For instance, see [http://fora.tv/2008/10/20/Naomi\\_Klein\\_and\\_Joseph\\_Stiglitz\\_on\\_Economic\\_Power](http://fora.tv/2008/10/20/Naomi_Klein_and_Joseph_Stiglitz_on_Economic_Power). When the video begins playing, click the Share link, and then look in the EMBED field. The embed src URL will be something like <http://fora.tv/embed?id=7950&type=c>. The id in this case is 7950.

Not the most elegant interface, but it should work for any fora.tv video.

That's awesome, Boone. Thanks so much for your work on this.

Yes, thank you so much, Boone! It works beautifully.
