| <b>Description</b>   |                  |                        |                   |
| <p>The order of the icons in TinyMCE is a bit awkward. This feature would reorder the icons with the goal that in the new order</p> <ol style="list-style-type: none"><li>1. similar functions are next to each other</li><li>2. the most used functions are in the top row</li></ol> <p>Also this reordering can be based on the assumption that the Kitchen Sink will be show by default. (<a href="http://redmine.gc.cuny.edu/issues/1390">http://redmine.gc.cuny.edu/issues/1390</a>)</p> <p>If possible it would be nice to apply this in the same release as the showing Kitchen Sink by default feature but this is not necessary as it is not a technical issue but a user one (so there is one big change rather than two).</p> <p>Responsibility assigned to Chris to come up with the new order. Anyone should feel free to make suggestions.<br/>Responsibility to Dominic to implement the new order.</p> |                  |                        |                   |
