<b>Description</b>			
I think we've max'd out the number of tags in the tag cloud for the Commons Codex. I might be wrong - but it seems that for tag clouds, there is a default number of tags (50), specified in <code>sitewide_multi-widget_homepage.php</code> . Can we bump this number up (maybe to 100) so that larger sites can display all the tags in their clouds?			

#### History

- Status changed from Assigned to Reporter Feedback

`sitewide_multi-widget_homepage.php` controls only the tag cloud powering <http://tags.commonscgc.cuny.edu/>. The tag cloud on the Codex is powered by WP's default tag cloud widget.

I can add another plugin for greater tag cloud control. Scott, if you want to have a look at <https://wordpress.org/extend/plugins/search.php?q=tag+cloud> and choose one that seems full-featured, that would be very helpful. Otherwise I will pick one myself.

Hi Boone - I like this one - <http://wordpress.org/extend/plugins/configurable-tag-cloud-widget/> - but if you think there's a better one, do that. Thanks!

Thanks, Scott. Plugin added in <https://github.com/castiron/cac/commit/d304a92e6cfc68b6a79ba1d823b76644b66182f5>. I'm marking this ticket as resolved; the release will go out very soon. Feel free to reopen if there are more issues.
