### Description

Hi André. We're getting a stray 403 Forbidden error on dev.cbox.gc.cuny.edu. Specifically with the following file:

<http://dev.cbox.gc.cuny.edu/wp-content/themes/infinity/engine/ICE/assets/js/jquery.cookie.js?ver=1.0>

Maybe another modsecurity issue? Would you mind having a look?

### History

#### #1 - 2012-07-11 10:01 AM - local admin

Ah ok, I disabled mod\_security there so we can test. In fact I'm inclined to just disable mod\_security during the development process, not to delay your advancement, then turn it back on if wished to verify what needs to be dealt with. What do you think?

In fact I'm inclined to just disable mod\_security during the development process, not to delay your advancement, then turn it back on if wished to verify what needs to be dealt with

That sounds excellent, André. I don't anticipate any problems because all users on the dev site are HTTP authenticated anyway. Thanks!

I don't anticipate any problems because all users on the dev site are HTTP authenticated anyway.

Agreed. Not concerned about this either. The key thing is that future users may want to run this under mod\_security so we can always turn it on later to test and make recommendations for the installation documentation.

Meanwhile should I marked this one *resolved*?
