Description

I created a child theme for simplicity - the only modification to the theme is make the category listing page not include the phrase "Archives |". So for example, when a reader clicks on Digital Fellows, he/she will be taken to a listing of all posts in this category, and the title will be "Digital Fellows" rather than "Archives | Digital Fellows".

I have attached the zip file of the child theme. Thanks.

Thanks, Scott. Boone, this is for the GCDI blog (<http://gcdi.commons.gc.cuny.edu>). If there is anyway you can upload the child theme Monday or Tuesday, I'd appreciate it. Many thanks.

Scott, I changed the way you named the theme a little bit, because I want to have it noted in the documentation that this is a bespoke theme for GCDI. I'll be making it available for that site only after 1.3.17 is released, probably later today.

Many thanks for getting this up quickly, Boone. And thanks for your work on this, Scott! I think this is your first child theme, right? Congrats, even if it was a small change!
