

## CUNY Academic Commons - Bug #2133

### www.preludenyc.org domain resolution

<b>Description</b> <a href="http://www.preludenyc.org">www.preludenyc.org</a> is no longer making it through to prelude12.commons.gc.cuny.edu. prelude12.org however is working. Both A records on our domain side are pointing to 146.96.128.200, so I believe that there is nothing I can do on our end. Here are the setting on our domain registry:  www 7200 146.96.128.200 @ (None) 7200 146.96.128.200  • (All Others) 7200 146.96.128.200

Hi André,

Can you look into this? Many thanks. Please see this related issue: <http://redmine.gc.cuny.edu/issues/2118>

- Status changed from Assigned to Reporter Feedback

I don't think this subdomain was included on the original request, but I went ahead and added it now.

Nope -- it wasn't. Thanks, André, for your quick work on this. Much appreciated. Seems to be working now, so I'll mark this as resolved.

Sorry if it wasn't on the full list, assumed that [www.would](http://www.would) work by default since I changed the IP address on my domain A records. Will check on segalcenter.org and others and make a revised list when we go to finalize that site's transition. Thanks guys.
