- Status changed from Assigned to Resolved

Fixed in <https://github.com/castiron/cac/commit/7102ba889419f064094e9a12ee66f44bbdb2c307>

The fix that the wp-mailinglist team put into place to combat the hack is half-assed and incomplete. So I've manually removed the problematic upload file, as in <https://github.com/castiron/cac/commit/c7ddabfd59cbcd9cabd5ec9901db6c23bcd4de3>, instead of depending on their partial fix.

This shouldn't be an issue in the future, since we're not renewing our subscription for this vendor.

This shouldn't be an issue in the future, since we're not renewing our subscription for this vendor.

Should we aim to remove it from the Commons altogether? And have we spoken to Keith yet about the problems introduced by the plugin?

It's working fine for now.

And have we spoken to Keith yet about the problems introduced by the plugin?

I have not.
