Feel free to bump this back to a point-point release if you think you'll get to it. In the meantime, trying to keep the bugfix releases clean.

WooThemes added to the newthemes branch: <https://github.com/castiron/cac/commit/8adfdaeae7b572596a36ea05db576ad04bd7075a>

Upon testing these themes, I found that four of them caused errors, so I removed them:

Foreward
Suit and Tie
The Journal
Thick

#7 - 2010-12-03 07:25 AM - Boone Gorges

What were the errors? Something consistent between those four themes?

#8 - 2010-12-03 08:00 AM - Matt Gold

No, not consistent. In some cases, the bp admin bar was screwed up (in one case, it was vertical instead of horizontal). In another, the theme itself didn't look right--images missing, layout messed up.

If you want to test, can you grab files from the repo or should I email them to you? I'm fine, btw with just not including them.
