<b>Category name:</b>	WordPress (misc)	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	1.4.17		
<b>Description</b>			
WP 3.5 has been out for a few weeks, and most plugins should be fixed for compatibility.			
As soon as 1.4.16 has been deployed, I'll upgrade the 1.4.x branch and deploy it to cdev. That way, the team can poke around a bit to make sure that nothing obvious is broken.			
NB BuddyPress will have to be upgraded to the latest 1.6 branch when WP gets upgraded.
