| Description | | | |
| Hi Scott, | | | |
| Can you create a documentation page that explains how to use the CBOX slider? It should include a discussion of "Site Features," how to set an image on the slide, the fact that images are best sized at 635x345, the fact that slides can't currently have embedded video. It should also discuss the options in the CBOX options for adjusting speed/transition of the slide images. | | | |
| Thanks! | | | |

This item looks like a duplicate of [#2383](#). Can it be marked as a dupe? Thanks. Documentation was done awhile back - but needs to be updated.
