It seems that the 12/31/2012 post "2012 Moments" repeats over and over for pages . This is happening for me on OSX 10.8.2 Chrome 24.0

It looks like we were using FeedWordPress to pull in posts across the Commons that were tagged through the Global Tags blog "news," which I think was causing the issue of duplicated posts. Looks like unsubscribing from the feed and deleting posts created through it has resolved the matter.
