

CUNY Academic Commons - Bug #2551

RBE on CBOX.org not working?

2013-04-24 09:01 AM - Matt Gold

Description			
Hi Ray --			
I replied to a forum post through RBE on commonsinbox.org this morning, but I don't think it posted. Can you please check out the situation? Many thanks.			
best,			
Matt

I deactivated RBE and reactivated it and it seemed to post what was in queue.

Tried to look at the debug log, but it doesn't exist on cbox.org; there's probably a permissions issue in generating the log.

Adding Boone as a watcher so he can let me know. Btw, I read your blog post on using the WP filesystem :) I should probably change to using the `wp_upload_dir()` instead of just `/wp-content/`.

#2 - 2013-04-25 08:14 AM - Matt Gold

Hi Ray --

Just received the message shown in the attached screenshot

#3 - 2013-04-25 08:14 AM - Matt Gold

I should probably change to using the `wp_upload_dir()` instead of just `/wp-content/`.

Then my blog post was a success :)

I think you received that message because RBE was processing the backlog of the queue and I left bbPress' anti-flood checks in.

Because bbPress thought you were posting really fast, RBE stopped the post from posting. I'll probably remove this check in RBE to prevent this. Good catch!

On second thoughts, I was thinking about how WP is able to post the debug.log in /wp-content/. I think the /wp-content/ directory should be okay to use.

When you have a moment, can you take look at cbox.org's /wp-content/ directory to see if the permissions are set properly?

When you have a moment, can you take look at cbox.org's /wp-content/ directory to see if the permissions are set properly?

I don't have sudo on the box, so I just created wp-content/bp-rbe-debug.log and did chmod a+w. Should work.

I think the /wp-content/ directory should be okay to use.

FWIW I think WP is doing it wrong here, and probably only does it this way for legacy reasons. Also, the WP debug log is probably only something you'd run on a dev site (where permissions may be set much differently) while the RBE log is something designed to run in production in at least some cases. But I digress :)

#7 - 2013-05-01 01:26 PM - Boone Gorges

- Target version set to Not tracked

#8 - 2013-08-11 11:37 AM - Boone Gorges

Hey Ray - Could I ask you to take a look at the debug log (which is working) and see if you can track down any issues?

#9 - 2013-08-15 12:47 AM - Raymond Hoh

- Status changed from Assigned to Resolved

Everything looks okay to me!

#10 - 2013-08-15 07:58 AM - Matt Gold

Thanks, Ray. I think that the reply did post -- there was just a short delay.
