<b>Description</b>			
Our current homepage for CBOX is way to text-y. Here's a site for an academic open-source project that does a nice job of visually presenting itself:  <a href="http://digress.it/">http://digress.it/</a>  Scott, can you take the lead on this? We can ask Mark or Chris for design help if needed -- and if you want one of them to do a mockup first that you can implement, please let me know. Many thanks.
