

## CUNY Academic Commons - Feature #273

### Install Collection extension for MW

2010-07-19 06:45 PM - scott voth

<b>Status:</b> Deferred	<b>Start date:</b> 2010-07-19
<b>Priority name:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category name:</b> Wiki	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Description</b> Once the new Wiki upgrade is in place, please install two new extensions: Collection and PDF_Book. (Hopefully they won't conflict with the other extensions we've got.) Here are the links: <a href="http://www.mediawiki.org/wiki/Extension:Collection">http://www.mediawiki.org/wiki/Extension:Collection</a> ; and <a href="http://www.mediawiki.org/wiki/Extension:PdfBook">http://www.mediawiki.org/wiki/Extension:PdfBook</a>	
Thanks!

#### History

##### #1 - 2010-07-19 06:51 PM - Matt Gold

- Status changed from New to Assigned
- Assignee set to CIC Michael

##### #2 - 2010-07-21 02:43 PM - Matt Gold

Since it will require some additional set-up work, we're going to put PDF\_Book on the slate for the next version of the Commons.

##### #3 - 2010-07-22 11:56 AM - Boone Gorges

- Target version changed from 1.0.1 to 1.0

##### #4 - 2010-08-23 04:13 PM - Boone Gorges

- Target version changed from 1.0 to 1.1

##### #5 - 2010-09-04 08:07 AM - Boone Gorges

- Subject changed from Wiki extension installs to Install Collection extension for MW

##### #6 - 2010-11-23 12:32 PM - Boone Gorges

- Status changed from Assigned to Resolved

I've enabled Collection on cdev in <https://github.com/castiron/cac/commit/47c487119cb2473b9f764eff2b3e4b148084e227>

Everything seems to be working right, except for the part where you try to render a page or a book as PDF. The extension appears to want to send the items to an external rendering server, but because cdev is behind a password wall (and my localhost is not accessible from the internet) I kept coming up with errors. I'm assuming that these will be fixed once we're on the live server; this is something I'll check during the 1.1. upgrade routine <https://github.com/castiron/cac/wiki/WordPress-3.0-upgrade-process-and-Actions-Required>

I'll mark the ticket as fixed for the moment, under the assumption that the extension will work when we go live. If it does not, I'll revisit the ticket and assign it a new milestone.

##### #7 - 2010-11-23 02:08 PM - Matt Gold

If possible, can you test this on a non-password-protected MW install so that we can learn more about the external rendering server process? Or would the differences in server environments detract from the utility of the test?

##### #8 - 2010-12-06 01:52 PM - Boone Gorges

- Status changed from Resolved to Assigned
- Target version changed from 1.1 to 1.1.1

It didn't work on the live site so I disabled it <https://github.com/castiron/cac/commit/000823aae98feabc78e03093484e730cc93c548f>

Export process needs debugging

**#9 - 2010-12-08 07:37 AM - Boone Gorges**

- Target version changed from 1.1.1 to 1.1.2

1.1.1 will only fix critical issues so I'm bumping this to 1.1.2.

**#10 - 2010-12-10 05:38 PM - Boone Gorges**

- Target version changed from 1.1.2 to 1.1.3

**#11 - 2010-12-13 07:11 PM - Boone Gorges**

- Target version changed from 1.1.3 to 1.1.4

**#12 - 2010-12-18 06:27 PM - Boone Gorges**

- Target version changed from 1.1.4 to 1.1.5

**#13 - 2010-12-20 11:59 AM - Boone Gorges**

- Target version changed from 1.1.5 to 1.1.6

**#14 - 2010-12-22 11:13 AM - Boone Gorges**

- Target version changed from 1.1.6 to 1.1.7

**#15 - 2011-01-04 06:27 PM - Boone Gorges**

- Target version changed from 1.1.7 to 1.1.8

**#16 - 2011-02-03 12:31 PM - Boone Gorges**

- Target version changed from 1.1.8 to Future release

I've just spent some time looking deeper into the extension. It requires an external rendering server (as I mention above). There is a publicly available rendering server, but it does not appear to work. It might be possible for us to set something up for our own use, but I'm thinking that at the moment we'll have to put it on the back burner. Bumping to future release.
