Hi Boone -- I'm giving a presentation to 400 new students at the GC at 11am, and I'll be featuring the Commons prominently. If there is any way you could knock this out by then, I'd appreciate it.

Some recent changes in the way that WP sanitizes certain multisite options caused values with asterisks (such as *.cuny.edu) to be stripped. See <http://core.trac.wordpress.org/ticket/15706#comment:24>

I've put in a workaround at <https://github.com/castiron/cac/commit/fe3aa601b11d0b47ff5c9e986d988d40b508f8bc>
