

CUNY Academic Commons - Bug #2809

Gravity Forms

2013-10-01 01:43 PM - Paul Hebert

Status:	Resolved	Start date:	2013-10-01
Priority name:	Normal	Due date:	
Assignee:	Boone Gorges	% Done:	0%
Category name:	WordPress (misc)	Estimated time:	0.00 hour
Target version:	1.5.4		
Description			
I activated the Gravity Forms plug in but I am unable to edit form elements. For example, I add radio buttons but I'm unable to edit the text/options for the radio buttons. I can move/add/delete them, but not edit. This seems to be true for any activation of Gravity forms.

- Status changed from Assigned to Resolved
- Target version set to 1.5.4

Confirmed. It appears that the version of GF on the Commons is a little out of date, and not compatible with the jQuery UI shipped with the most recent version of WP. I've upgraded to a newer copy I have lying around, and it appears to fix the problem locally.

Upgraded in <https://github.com/castiron/cac/commit/a86ff37dd12a34e8a2a3cf162e6350013e769627>. Paul, this'll be available on the Commons after the release later tonight.

Matt, do you have a Gravity Forms license key? Could you send it to me privately?
