

CUNY Academic Commons - Bug #2838

BP Docs read|edit|history|delete links not working

2013-10-18 10:07 PM - Chris Stein

Status: Resolved	Start date: 2013-10-18
Priority name: Normal	Due date:
Assignee:	% Done: 0%
Category name:	Estimated time: 0.00 hour
Target version: 1.6	
Description Right now when you are viewing a list of Docs you need to hover over the description to see the links to read edit history delete The problem is that these links don't work on at least the iPad and possibly (probably?) on other touch devices. This problem is related to #2837 and is because the CSS uses :hover to expose those links and that causes problems for touch. Until we devise a more general solution to the problem, I propose a short term solution where we remove the visibility:hidden; rule on line 73 in bp-docs.css and show the links all of the time. This means we can also comment out lines 85-87 that make .row-actions visible. Once we figure out a more general approach to hover we could revisit this.

History

#1 - 2013-10-21 08:03 PM - Boone Gorges

- Target version set to 1.6

#2 - 2014-01-28 10:22 PM - Boone Gorges

Fixed in BuddyPress Docs at <https://github.com/boonebgorges/buddypress-docs/commit/0d3717f6070d705d39439e8a9a8136343953ddb6>

We are running an old version of this plugin, so I'll do a separate fix for the Commons.
