<b>Description</b>			
Despite adding the Storify Embed Wordpress plugi: <a href="http://wordpress.org/plugins/storify-embed/">http://wordpress.org/plugins/storify-embed/</a> . When I start a post on the JP365 page and add the link to the storify as suggest by that plugin and it doesnt seem to be populating the storify stream.

- Target version set to Not tracked

It seems to be working in my tests. Note that, in order for embedding to work, the storify.com URL must be alone in its own paragraph. Something like:

Lorem ipsum.....

<http://storify.com/WilneidaNegron/meet-the-new-academic-advisory-council-that-will-h>

More paragraphs...

Could you try again, making sure that your syntax is correct?

Great, yes. I think that did it. I do see when its on its own that the storify stream is shown in the post.

Thanks so much,  
Wilneida
