Target version:	Not tracked		

Description

Hi all - can someone please set up an effective 'catch' for the <http://cuny.is/yourname> link we have been using?

It will thereby serve as a demonstration link pointing to the [cuny.is codex](http://cuny.is/codex) page.

Assigning Boone preliminarily.

Avail to discuss!

- Target version set to Not tracked

Sure, I'd be happy to. This is the correct URL for the redirect, right? <http://codex.commonscs.cuny.edu/cuny-url-shortener/>

I think so - Matt, can you confirm that's the page to which you'd like users that click <http://cuny.is/yourname> to be directed ?
