Description

I've noticed that the sliders don't work anymore on the Woo Canvas theme. There don't appear to be any errors that I see. I know we had this issue ([#2112](#)) and it was caused by another plugin conflict, but this happens on a brand new blog with no plugins. The Commons uses Canvas for the Codex, Help & Support, and Commons News.

This also relates to [#2080](#) - a request for a new version of Canvas. Now that we have the Woo contract in place, can we upgrade and see if this fixes the slider issue?

Also relates to [#2924](#) - we need to create a child theme of Canvas for the Codex and make some little changes in the header, so that the Commons logo redirects to home page. Dom is involved in this one. But seems to make sense to get the Canvas theme working again.

Thanks, Scott. I'm actually not sure that we have renewed Woo (does anyone else remember?). If not, I can buy this on Monday.

To the best of my knowledge we **have not** renewed our Woo subscription.

currently unable to change my password on the WT site. Unable to email customer support because they require login to do so. Argh.

Excellent. I received the credentials email, I'll work with Scott to find a solution to the Codex header issue and work on upgrading any WooThemes while working through the theme audit.

Thanks, Dom

#7 - 2014-02-05 03:27 PM - Boone Gorges

- Category name changed from WordPress (misc) to WordPress Themes

- Target version set to 1.5.17

Let's see if we can get this sorted out for the next maintenance release.

#8 - 2014-02-05 03:34 PM - Dominic Giglio

Will do, Scott and I briefly discussed the two or three issues he and I have in common between our last two meetings, so I'll hook up with him and knock those out. They are simple issues.

#9 - 2014-02-11 07:29 PM - Boone Gorges

- Target version changed from 1.5.17 to 1.5.18

#10 - 2014-02-20 10:45 PM - Boone Gorges

- Target version changed from 1.5.18 to 1.5.19

#11 - 2014-03-01 02:48 PM - Boone Gorges
