#### Description

Hi, I sent invitations earlier today to the students in my and Michael M's ITP Core 2 course and the students are reporting that they never received the invites. I'm also wondering if there's something funky up with the group because it's showing last activity from 2 months ago (which was the date that Michael originally created the group), and there has definitely been action since then.

Here's the group URL: <http://commons.gc.cuny.edu/groups/itp-core-2-spring-2014/>

The group blog seems okay, FWIW. Group is private and blog is public.

(And this is unurgent -- I've asked our students to just go to the group page and request membership so they should be fine.)

Thanks!

Thanks, Maura. Marking as high priority in case this is a wider problem affecting a large number of groups.

Thanks Matt and Boone! See you tomorrow.

##### #3 - 2014-02-01 01:44 PM - Boone Gorges

- Status changed from Assigned to Resolved

It looks like this was being caused by a poorly formed <form> action, which was inconsistently affecting group invitations. Fixed in <https://github.com/castiron/cac/commit/2fa88f0f3051470d99d921361802af93463d42f4>
