Description			
Hello --			
My project team for Matt Gold's DH class has a blog at http://dhbox.commons.gc.cuny.edu -- as of today, we noticed that it now redirects to http://ruthobrien.org . None of us modified anything since last week, so this is unexpected.

Very sorry, Harlan. IT helped us set domain mapping for Prof. O' Brien on Friday, as we had done for you earlier; not sure whether the issue is with the server itself or our WP config. Boone, can you please look into this? Many thanks.
