#### Description

- What's the name of the plugin/theme? Multiple Category Selection Widget  
<https://wordpress.org/plugins/multiple-category-selection-widget/>

- In a few words, what does it do? This plugin gives you the ability to provide your users with a widget full of dropdowns based upon parent categories and their sub-categories.

- How is the plugin/theme different from what's already provided on the Commons? It looks similar to the AVH Extended Categories Widgets plugin already available, but I'm not sure if it gives users the ability to run boolean searches via categories (which was the reason for this plugin request).

- What's the potential impact? Who will use it? All members, gives the ability to run boolean searches via categories.

- Who initially made the request? Steven Klein

- Who is the plugin author? zackdesign

- Say a little bit about the release history and popularity of the plugin. How many times has it been downloaded? When was it last updated? Last Updated: 2013-11-8  
Downloads: 53,475
