Description

Hello --

I attempted to have a child theme applied to the Room4108 site (Feature [#3088](#)) and it did not work as the CUNY Academic Commons had a different version of the theme than the one now publicly available that I had used to develop the child theme with.

Room4108 has decided to go with a different theme -- ThreatToCreativity (publicly available here: <http://wordpress.org/themes/threattocrativity>). I was hoping to get a copy of the version the CUNY Academic Commons has to customize.

Please let me know any other information I can provide!
