- Target version changed from 1.6 to 1.7

Michael, we're at a point where we need to decide whether to include this in 1.6 or move it to 1.7. If we're going to include in 1.6, we need the logo right away (like tomorrow at the latest). I am going to assume that this is not feasible for you and that we should move the ticket to 1.7, but if you have time to do something, please do so and we can move it back to 1.6.

Here are a couple of transparent PNG versions. Let me know if more work is necessary.

Huge thanks for working on this, Michael! Really appreciate that.

Were we thinking that these would go in the header or footer? If the header, the size here might be right. If the footer, a smaller version might be more desirable.

Sure here are a couple more versions reduced by approximately 100 px increments.
