

CUNY Academic Commons - Bug #3326

cdev permissions are incorrect

Description			
I can't properly switch between branches on cdev because of permissions errors. This is the same issue as #2889 (which was on the production site), and the solution is the same as what's described here: http://redmine.gc.cuny.edu/issues/2889#note-3			
Matt, can you please place the request?

Hi Matt - Following up on this. It looks like the permissions are still incorrect. The following should fix it:

```
$ chgrp -R commons /var/www/html
$ chmod -R g+w /var/www/html
```

Thanks!

This has been resolved.

Ray - FYI, this now means that you can pull stuff to cdev. Thanks for your patience!

Matt, could you please follow up on this? It doesn't appear to be fixed yet, and it's making the testing workflow pretty cumbersome. Ray and I have to resort to ugly cleanup methods on cdev every time we want to pull latest changes.
