<b>Description</b>			
Hi Boone,			
I would like to embed in a WP page a markdown file (.md) hosted on github. I would love for it to be refreshed as I push updates to github. Do you know of any reasonably easy way to do that?			
Here are some of the Github/Markdown plugins I found, none of which seem to do the trick:			
Github WP plugins - <a href="http://wordpress.org/plugins/search.php?q=github">http://wordpress.org/plugins/search.php?q=github</a>			
WP Markdown - <a href="https://wordpress.org/plugins/wp-markdown/">https://wordpress.org/plugins/wp-markdown/</a> (just allows you to use markdown)			
Thanks in advance for any thoughts you have.			

#### History

Is it possible to store it in a Gist? <http://gist.github.com> If so, Github has an embed code. This is the easiest.

If it's part of a larger repository, then maybe the answer is no?

##### #2 - 2014-09-08 10:19 AM - Matt Gold

Yes, I think I can make a gist work. How might I use the embed code?

##### #3 - 2014-09-08 10:22 AM - Boone Gorges

There's an embed script at the right of each gist: <https://gist.github.com/boonebgorges/79b5d0f628a884cb3b3b>

Huh. I had assumed that Multisite would disallow the embed, but apparently not - <http://gcenglishf14.commons.gc.cuny.edu/syllabus-and-calendar/>

Many thanks!
