Description			
<p>I have switched back to self-hosting because I will need multi-site for teaching in the near future. Unfortunately I moved everything over (DNS/pointing/etc.) before I deleted things on the Commons server itself. Could someone please de-link the commons address (http://bethanyholmstrom.commons.gc.cuny.edu) with my domain (http://bethanyholmstrom.net) on the Commons end of things?</p> <p>Thanks,</p> <p>Bethany</p>

Hi Bethany,

Boone can confirm, but I think that all you need to do is point the hosting provider for bethanyholmstrom.net to the new location and you should be good to go.

Nope, I also had to disable the internal mapping. I have done so. Bethany, the site is available again at bethanyholmstrom.commons.gc.cuny.edu and you may do whatever deleting you'd wish.
